Rostov-on-Don, 2021

## **CHARACTERISTICS OF THE EDUCATIONAL DISCIPLINE**

The **purpose** of studying the academic discipline: deepening legal knowledge and the formation of an appropriate worldview among undergraduates, training specialists with a high level of knowledge in the field of history and methodology of legal science, which, in turn, allow you to successfully study other legal disciplines and effectively carry out professional activities in the field of development and implementation of legal norms, ensuring the rule of law and order, conducting scientific research

**Objectives** of studying the discipline:

- 1 To identify the stages and logic of the development of legal science.
- 2 To reveal the modern methodological arsenal of legal science, to understand the purpose of scientific research methods and the scope of their application;
- 3 Master the basics of methodological analysis and the skills of constructing a methodological space for performing work in the field of jurisprudence;
- 4 To study the peculiarities of the language of legal science and develop the ability to use it.
- 5 Understand the possibilities of various forms of schematization, formalization and modeling in scientific research, education and legal practice;
- 6 To test in practice the main elements of the methodology: goal-setting, self-determination, methodological reflection, etc.
- 7 Acquire the skill of organizing and conducting a specific research focused on solving theoretical and practical problems.
- 8 Master the methodology of bibliographic work, including using modern technical and informational capabilities.

**The policy of the discipline** (indicators of the formation of competencies):

UK-6.1 Assesses its resources and their limits (personal, situational, temporary), uses them expediently;

UK-6.2 Determines educational needs and ways to improve one's own (including professional) activities based on self-assessment;

UK-6.3. Builds a flexible professional trajectory taking into account the accumulated experience of professional activity, dynamically changing requirements of the labor market and personal development strategies;

PC-4.1 Carries out scientific and practical activities within the competence;

PC-4.2 Organizes and conducts scientific and practical conferences, training seminars, other forms of scientific and practical activities on the investigation of crimes;

PC-4.3 Publicly presents research results, conducts polemics and discussions.
